

This land is **YOUR LAND**

AMERICA THE BEAUTIFUL

The National Park Service, founded in 1916, stewards our public lands and preserves the animals that live there.

The Republican Party wants to sell it off. The “Big Beautiful Bill” slashes \$1.2 billion—33%—of the NPS’s operating budget. It puts about 3 million acres of land up for sale in 11 Western states, with an increase in coal mining and fossil fuel leases; logging will increase by 25% in national forests. Finally, newly privatized lands will displace animals and threaten hunting and fishing.

Is this the beautiful America you want for your children and their children? Read more here, and call your Senator to oppose this.

“Wilderness is not a luxury but a necessity of the human spirit, and as vital to our lives as water and good bread.”

—Edward Abbey
